

SD 72 Web Apps

Accessing SD72 Web Apps

In order to access your H:// drive or your Shared Drive from home, you need to access the SD72 Web Apps page. Click [HERE](#) to watch a youtube video created by Rob Hatfield which gives you directions on how to access and install the application needed to view your H:// drive from home.

(Note: you can access it from the student section from the Distirct Portal, OR click on the Teacher Portal and access it from there.)

Accessing Files through Web Apps

In order to work on your H:// drive files from home, you need to be able to access them. You can do one of two things. You can open them up directly from Webapps by double clicking on the file itself and do your editing "online". Any changes that are done to the document are saved directly to the document in your H:// drive.

You can also transfer or download that file onto your local drive and work on it from home. Watch the Youtube video created by Rob Hatfield on how to do so by clicking [HERE](#).
